

Winscribe Cloud

Product Description

The CIOs of today's organisations are no longer solely responsible for the management of IT. Now they are also responsible for supporting business growth by reducing costs and driving innovation, as an effort to build a strategic advantage. So how can you drive innovation and lower costs? The solution is the cloud!

One of the most effective ways to drive innovation, boost staff productivity and reduce costs is through cloud-based speech technology. Since speech-enabled documentation is up to 5 times faster than manual typing, business professionals have more time to acquire new work, address client needs and more!

With Nuance's Winscribe Cloud, a cloud-based SaaS licensing option for Winscribe's industry-leading digital dictation, documentation and speech recognition workflow management solutions, there are no software or servers to buy, install, maintain or upgrade. With Winscribe Cloud, you can do more with less and:

- Reduce upfront and on-going costs
- Reduce IT resource needs
- Automatically stay up-to-date on the latest software version
- Pay as you grow, with a predictable annual fee
- Streamline dictation and documentation processes

Key Features

- » Full digital dictation, documentation and transcription workflow management without the burden of IT management
- » Supports optional speech recognition
- » Enables system scalability and growth
- » Ability to work from anywhere, anytime
- » Covers all three critical areas of security: physical security, operations security, and system security
- » No cap on the number of users – supporting businesses both large and small
- » Enables process automation and centralised data management
- » Seamless support for Winscribe's mobile applications
- » Ability to future-proof your technology
- » Built-in data redundancy measures help protect information in the event of disk failure, weather, natural disasters or physical damage to servers
- » Installation available via silent installs – with programmable MSI packages, as well as via Web download installations

“We have seen a much faster turnaround of patient reports... Letters can be expedited when needed even when the dictation is coming from a satellite office.”

Key Benefits

Spend less time on documentation and more time serving clients and working on other important tasks. Winscribe Cloud allows you to deploy a full digital dictation and transcription workflow management solution without the burden of IT management. Other benefits include:

Increase staff productivity and improve documentation

Minimise system downtime in the event of an issue at your office

Scalability, flexibility, and mobility of cloud technology

Safe and secure data transmission and handling

Lower cost of ownership and reduce IT headaches

Optional speech recognition and mobile dictation

Hosting Types

Public Cloud Hosting: Winscribe’s public cloud offers an excellent solution for organisations with standard workflows and no external integrations. Our public cloud allows multiple clients to share the same underlying server infrastructure, managed by Winscribe. However, there is a separation of data maintained.

Private Cloud Hosting: Winscribe’s private cloud is ideal for clients that have more complex workflows or integrations, as well those that would prefer not to use a shared server. The servers and system are managed by Winscribe, but additional management features and capabilities exist for customers.

N3: Winscribe also supports a secure N3 cloud option that is only accessible to NHS organisations in the United Kingdom (UK).

About Nuance Communications, Inc.

Nuance Communications is reinventing the relationship between people and technology. Through its voice and language offerings, the company is creating a more human conversation with the many systems, devices, electronics, apps and services around us. Every day, millions of people and thousands of businesses experience Nuance through intelligent systems that can listen, understand, learn and adapt to your life and your work. Winscribe is now part of Nuance’s portfolio of solutions. For more information, please visit nuance.com.
